Subject: Fw: SCAP updates to Asarco Globe and VB/I70
Attachments: paula.pdf

Hi Paula. I was checking the 2013 potential target list and noticed that VB/I-70 is listed for achieving Human Exposure Under Control (in 2013/3Q) and Ground Water Migration Under Control (in 2013/3Q). Both are currently listed as "insufficient data" right now. With the SCAP changes we submitted today, both these dates seem unrealistic probably should be changed to when we think they more likely will be under control.

HQ is also looking at sites that have been in the "insufficient data" category for a long time. So, do you have a feel for when we might know enough to say "not under control"? If I recall correctly, Sam believed more gw data was needed to make a determination for that gw EI, but it's been months since I discussed it with him. I don't know enough about the site, but I'm guessing you know more when there are at least proposed plans for OUs 2 and 3, yes? Or do you have enough info now to change them to "not under control" right now?

This may be confusing, so please let's talk. Thanks!

Fran

I have updated CERCLIS for these two sites. Attached is an updated SCAP-2 report.

Thanks
Dianna

Hi Dianna...Steve W. asked me to follow-up with some of the SCAP updates for Unit A. Attached please find ones for Asarco Globe and VB/I-70. Please let Paula or me know if you have questions. Thanks!

Fran
